

Why the Shootings in America... Instead of the Suicide Bombers?

In Islam if they touch pork in any way they are unclean for 7 days. If they are blown up and any of their body parts touch a body part or the blood of someone who has eaten any pork in the last 7 days they will go to hell.

Too many people in America eat bacon & eggs or pork sausage for breakfast; too many of us eat ham sandwiches & pork chops. It is critical for them not to blow themselves up near anyone who has eaten any of these things in the last 7 days so, they shoot us.

And when they shoot a non-believer they believe they are sending them to hell. If anything of us gets on them spit or splattered blood and they die before they become clean again which would take 7 days of cleansing they believe they will go to hell.

Maybe anyone that carries a gun should grease the tips of their bullets or the end of the barrel with pig fat (Bacon grease). Maybe all **terrorist** dead or not should be touched by some pig fat; even if they are dead. This they believe would keep them from their heaven even if they're already dead.

This ideology of their going to hell should become common knowledge to all so, they would think twice about being part of a mass shooting in trying to send us to where they don't want to go.

Let the punishment fit the crime...

Even if it's only in their heads,
It maybe the best deterrent yet,
next to the truth.

Everyone needs to know this...

And if they know we know
And we are taking any kind of action...
What a deterrent.

Get the word out !
